EPSA (Escuela Politécnica Superior de Albacete) is a Spanish School of Engineering at the University of Castilla-La Mancha. The University of Castilla-La Mancha was created by Law on June 30th 1982 by integrating different University Centres, attached until then to several Universities, and the creation of new centres. The University of Castilla-La Mancha is a regional institution structured into four campus: Albacete, Ciudad Real, Cuenca and Toledo and two academic units at the towns of Almadén and Talavera de la Reina. EPSA trains specialised engineers in Computer Engineering and Industrial Engineering (Majors on Mechanics, Electronics and Electricity).

The EPSA offers to the students a 3+2 year full-time training which result in the Spanish "Enginner Degree", authorised by the MEC (Spanish Ministry of Education and Culture). In order to facilitate our actions of European cooperation with other higher educational establishments we have organised our study programmes in semesters, applied the ECTS to the range of our train modules.

From the EPSA direction team, we are looking for new European partnerships, in order to sign bilateral agreements enabling the mobility of students and teachers throughout Europe (SOCRATES/ERASMUS), but also to anticipate shared developments of teaching modules and study programmes, according to the European declaration of Bologna.

We would like to give our student the opportunity to perform an academic stay abroad of 1 or 2 semesters, on undergraduate/graduate level units, identical or complementary to those we are offering. In exchange, we would like to welcome European students wishing to follow our Computer Engineering and Industrial Engineering modules, for 1 or 2 semesters.

You will find more details on our training programme in Computer Engineering and Industrial Engineering on our website:<http://www.pol-ab.uclm.es>. We are also attaching to this letter our training programme in Computer Engineering and Industrial Engineering (EPSA(courses).pdf file).

Please do not hesitate to contact us, we shall be glad to discuss eventual bilateral agreements opportunities.

Prof. Pedro Cuenca Castillo
Vice-Dean of International Cooperation
Escuela Politécnica Superior de Albacete
